

# Uber Eats Promotional Offers

## 1 Introduction

Uber Eats frequently provides promotional offers to help users save on their orders. These offers can include discounts, free delivery, or bonus credits and are often time-sensitive. This document explains the types of promotional offers available and how users can redeem them.

## 2 Types of Promotional Offers

### 2.1 Discounts on Orders

Discount offers may be available for specific restaurants, first-time users, or general promotions across the platform. These can range from percentage-based discounts, such as 10% off, to fixed-amount discounts, like \$5 off an order.

### 2.2 Free Delivery

Uber Eats sometimes offers free delivery promotions, either for all orders within a certain timeframe or for specific partner restaurants. Free delivery offers are often available during special events, holidays, or regional campaigns.

### 2.3 Seasonal and Event-Based Promotions

Throughout the year, Uber Eats runs special promotions during holidays, weekends, or large-scale events. For example, promotions may be tied to the Super Bowl, Black Friday, or regional festivals, offering exclusive discounts for users in specific locations.

### 2.4 Referral Bonuses

Users can earn bonuses by referring new customers to Uber Eats. When the referred user places their first order, both the referrer and the new customer may receive a promotional credit that can be applied to future orders.

### **3 How to Redeem Promotional Offers**

Promotional offers are usually redeemed at the checkout screen. Users can enter a promo code in the designated field, and the discount will be applied automatically if the code is valid and meets any specific conditions.

### **4 Expiration Dates and Usage Limits**

Most promotional offers have expiration dates, after which they can no longer be used. Some offers may also have usage limits, such as "one-time use" or restrictions tied to specific restaurants, locations, or order minimums.

### **5 Conclusion**

Uber Eats offers a variety of promotional deals to enhance the customer experience. These promotions can significantly reduce the cost of orders, especially during peak promotional periods. Users should regularly check the app for new and active offers.
